DETAILED ACTION

1. The prosecution of this application is reopen.
2. Claims 30-39 are in the case.
3. A reviewing of the claims indicated that distinct and independent inventions are being claimed. Therefore, a restriction is required.

Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 30-38, drawn to paroxetine methane sulfonate crystalline, composition thereof and method of using thereof, classified in class 546, subclass 197 and class 514 subclass 321.
- II. Claim 39, drawn to process of making paroxetine hydrochloride, classified in class 546, subclass 197.

The inventions are distinct, each from the other because:

Group I and Group II are independent and distinct inventions because Group I invention is drawn to the sulfonate salt of paroxetine, its composition and use which depends on the patentability of the product *per se*. Group II invention is a process of making a hydrochloride salt of paroxetine and the patentability of the process depends on the steps, operating conditions and reactive parameters. Therefore, group II process is unrelated to group I compound *per se* invention, and a restriction is required.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Celia Chang whose telephone number is (703) 308-4702. The examiner can normally be reached on Monday through Thursday from 8:30 am to 5:00 pm.
